

Water Ring & Etch Remover

Polishing Powder For

- Marble
- Limestone
- Terrazzo
- Other Natural Stone
- Travertine

Special Features

- No Oxalic Acid
- Safe to Use
- Easy to Use
- Fast Acting
- Interior & Exterior
- Cost Effective

PRODUCT DESCRIPTION

KEEP OUT OF REACH OF CHILDREN. **Water Ring & Etch Remover** polishing powder is a unique blend designed to enhance the natural shine of natural stone and terrazzo. **Water Ring & Etch Remover** will remove light scratches, water rings and acid etch marks. **Water Ring & Etch Remover** is an effective means of maintaining the factory finish of marble, travertine, limestone, terrazzo and other natural stone surfaces. Unlike recrystallization or vitrification, **Water Ring & Etch Remover** does not change the surface composition of the stone. **Water Ring & Etch Remover** is an easy to use polishing process that has been used in stone factories and in the field for decades. **Water Ring & Etch Remover** is great for ongoing maintenance, as well as the final polishing step in any stone restoration procedure. Heavy scratches and etch marks may need to be honed with the **Mira Hone** or **Pyramid Diamond Abrasive System** prior to using **Water Ring & Etch Remover**.

Sample Testing

Due to the differences of each material, several inconspicuous test patches should be completed to assure maximum performance. **User must determine suitability of the product for their intended use.**

Special Precaution & Protection

Always protect neighboring surfaces including masonry, wood, carpet, metal, landscaping and other non masonry surfaces.

Water Ring & Etch Remover should not be left on the surface for any length of time without constant buffing action. If buffing is stopped **Water Ring & Etch Remover** must be immediately picked up to avoid burning. Place the floor or hand machine on a plastic or teflon sheet when not in use. **Water Ring & Etch Remover** is not recommended for granite or synthetic surfaces. **Water Ring & Etch Remover** can be run through a sifter for a more consistent powder.

APPLICATION INSTRUCTIONS

Read entire label and SDS/PDS before using.

All previous applied sealers, coatings and/or waxes must be removed using **Mira Strip** or **H2O Strip** as directed.

Using a **Marble Master 1000** (175 rpm, 150 lbs.) floor machine equipped with a **Mira Pad**, white polishing pad or a tampico brush will provide optimum results. Wet a small area (2 - 4 sf) with clean water. Sprinkle **Water Ring & Etch Remover** on the area and buff making slow, even passes. Add water or **Water Ring & Etch Remover** as needed to maintain a watery/milky slurry. **DO NOT ALLOW Water Ring & Etch Remover SLURRY TO DRY ON THE SURFACE.** Buff the stone for 1 - 2 minutes or until desired polish is achieved. Additional **Water Ring & Etch Remover** may be used to increase polish. Be careful not to buff too long in any given area as this may create a burn. After polishing, rinse the stone thoroughly with the appropriate **Miracle Cleaner** as directed. Agitate with a soft brush and remove using a wet vacuum. This procedure is essential for neutralization of the polished surface.

Counters: Use a hand machine (600 - 800 rpm) equipped with a **Mira Pad**, white pad or tampico brush and use in the same manner as with floors.

Wall: Wet the small area to be worked and sprinkle the **Water Ring & Etch Remover** directly onto the polishing pad or brush. Buff the walls in small sections. Be careful to protect neighboring areas from dripping of the **Water Ring & Etch Remover** solution.

Small Areas: **Water Ring & Etch Remover** can be worked by hand for very small areas or trouble spots. Follow the same procedure as above, buffing with a small white pad and using rubber gloves. This method can effectively remove many light scratches, water rings and etch marks while restoring desired luster to those very small and hard to reach areas.

Heavy Duty Cleaning: Use **Pre-Cast Concrete Cleaner, GCFR or Liquid Poulitice** as directed.

Light Cleaning: Use **Mira Clean #1, Stone Cleaner Preserver or Counter Kleen** as directed.

Water, Stain & Slip Protection

Application of **Miracle Penetrating Sealer/Impregnator** will reduce penetration of all staining materials and make the surface less slippery.

Color and Gloss Enhancement

For added color with "Textured and Non polished" surfaces, **Mira Matte** may be used. For porous type "Paver", **Salttillo & Terra Cotta Paste & Liquid Wax, Stone Polish, Stone Polish Preserver, Granite Brite, Mira Brite, Mira Dust, Marble Conditioner** or **Tile Brite** may be used as directed.

Polish Enhancement

Periodically use **Mira Dust, Marble Conditioner, Mira Brite, Mira Pad or Granite Brite** as directed.

Mold, Mildew and Bacteria Sanitation

For best results in killing mold, mildew, bacteria and other micro organisms, use **Miracle Disinfectant** as directed.

Coverage

Coverage will vary depending on the density, porosity, texture, surface absorption, weather, time solution left on surface and application methods. Used as directed, **Water Ring & Etch Remover** will do approximately 13 - 28 sq. meters per pound or 3 - sq. meters per 4 oz. bottle.

MAINTENANCE

For ongoing maintenance instructions please refer to **Miracle Sealants Care Guide**. Refer to the **Miracle Sealants Product Recommendation Chart** for specific product recommendations.

Storage

Store **Water Ring & Etch Remover** in the original upright container properly sealed and unmixed. Stored at 77° F (40° C), **Water Ring & Etch Remover** will have a shelf life of 12 months. Do not allow to freeze
